Product parametric performance is indicated in the Electrical Characteristics for the listed test conditions, unless otherwise noted. Product performance may not be indicated by the Electrical Characteristics if operated under different conditions. 1.  $R_{\theta JA}$  is the sum of the junction-to-case and case-to-ambient thermal resistance where the case thermal reference is defined as the solder

mounting surface of the drain pins.  $R_{\theta JA}$  is guaranteed by design while  $R_{\theta JA}$  is determined by the user's board design.

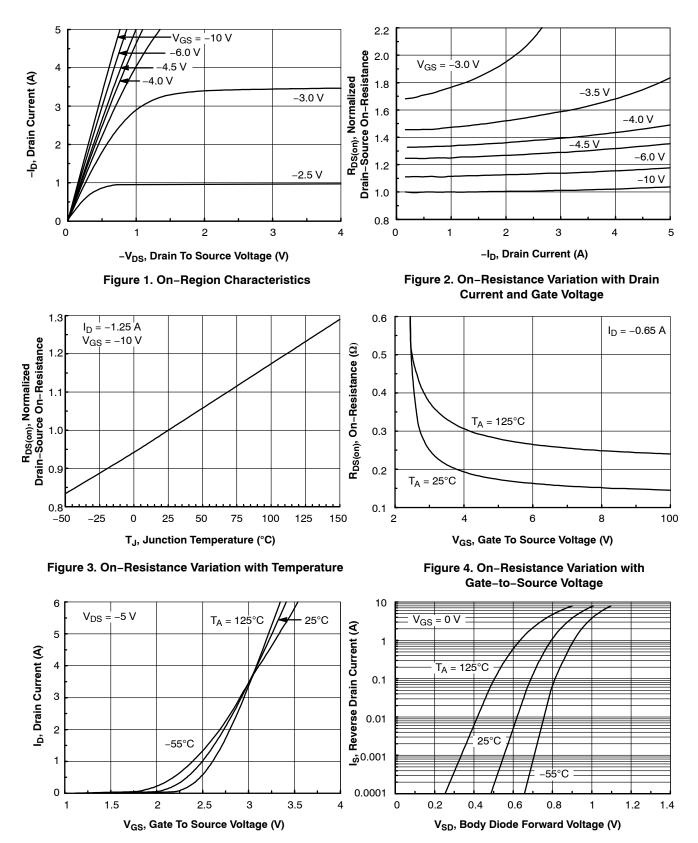

a)  $250^\circ\text{C/W}$  when mounted on a 0.02 in^2 pad of 2 oz. copper.

b) 270°C/W when mounted on a minimum pad. 25
