

# Final Product/Process Change Notification

Document #:FPCN24342ZA Issue Date:05 Jan 2022

	T		
Title of Change:	Changing wire bond from 0.8 mil Au to 0.8 mil Pd-coated Cu for JFETs assembled in SOT-23, mold compound change from Hitachi GE200F to Hysol GR640HV Increasing top metal thickness to 20KA support this change as well		
Proposed Changed Material First Ship Date:	14 Jul 2022 or earlier if approved by customer		
Current Material Last Order Date:	14 Apr 2022 Orders received after the Current Material Last Order Date expiration are to be considered as orders for new changed material as described in this PCN. Orders for current (unchanged) material after this date will be per mutual agreement and current material inventory availability.		
Current Material Last Delivery Date:	13 Jul 2022 The Current Material Last Delivery Date may be subject to change based on build and depletion of the current (unchanged) material inventory		
Product Category:	Active components – Discrete components		
Contact information:	Contact your local onsemi Sales Office or Andy.Tao@onsemi.com		
PCN Samples Contact:	Contact your local onsemi Sales Office to place sample order.  Sample requests are to be submitted no later than 45 days after publication of this change notification.  Samples delivery timing will be subject to request date, sample quantity and special customer packing/label requirements.		
Sample Availability Date:	31 Jan 2022		
PPAP Availability Date:	31 Jan 2022		
Additional Reliability Data:	Contact your local onsemi Sales Office or <a href="mailto:c.l.yang@lps.com.cn">c.l.yang@lps.com.cn</a>		
Type of Notification:	This is a Final Product/Process Change Notification (FPCN) sent to customers. The change will be implemented at 'Proposed Change Material First Ship Date' in compliance to J-STD-46 or ZVEI, or earlier upon customer approval, or per our signed agreements. onsemi will consider this proposed change and it's conditions acceptable, unless an inquiry is made in writing within 45 days of delivery of this notice. To do so, contact <a href="PCN.Support@onsemi.com">PCN.Support@onsemi.com</a> .		
Change Category			
Category	Type of Change		
Bare Die	New / change of frontside metallization		
Process - Assembly	Change mold compound		
Process - Assembly	Change of wire bonding		

### **Description and Purpose:**

onsemi is notifying customers of its use of 0.8 mils Pd-coated Cu wire for JFET devices assembled in SOT-23, mold compound change from Hitachi GE200F HWG to Hysol GR640HV at onsemi Leshan, China facilityThe change requires wafer top metal thickness increase from 15 KÅ AlSi to 20 KÅ AlSi. Upon the expiration of this PCN, these devices will be built with 0.8 mils Pd-coated Cu wire and will use the thicker top at the same site. Datasheet specifications and product electrical performance remain unchanged. Reliability Qualification and full electrical characterization over temperature has been performed.

	Before Change Description	After Change Description
Bond Wire	0.8 mils Au wire	0.8 mils PD-coated Cu wire
Wafer top metal	15KA AlSi	20KA AlSi
Mold compound	Hitachi GE200F HWG	Hysol GR640HV

# Final Product/Process Change Notification

Document #:FPCN24342ZA Issue Date:05 Jan 2022

Reason / Motivation for Change:	Process/Materials Change
Anticipated impact on fit, form, function, reliability, product safety or manufacturability:	The device has been qualified and validated based on the same Product Specification. The device has successfully passed the qualification tests. Potential impacts can be identified, but due to testing performed by onsemi in relation to the PCN, associated risks are verified and excluded.  No anticipated impacts.
o	

### **Sites Affected:**

onsemi Sites	External Foundry/Subcon Sites
Leshan Phoenix Semiconductor, China	None
onsemi Roznov, Czech Republic	

# Marking of Parts/ Traceability of Change:

At the expiration of this PCN devices will be assembled with 0.8 mils PD-coated Cu wire at onsemi existing Leshan facility. Products assembled with 0.8 mils PD-coated Cu wire from the onsemi facility will have a Finish Goods Date Code of WW24 2022 or greater.

### **Reliability Data Summary:**

**QV DEVICE NAME: SMMBFJ177LT1G** 

RMS: 79236 PACKAGE: SOT23

Test	Specification	Condition	Interval	Results

Document #:FPCN24342ZA Issue Date:05 Jan 2022

### NOTE: AEC 1 Pager are attached.

To view attachments:

- 1. Download pdf copy of the PCN to your computer
- 2. Open the downloaded pdf copy of the PCN
- 3. Click on the paper clip icon available on the menu provided in the left/bottom portion of the screen to reveal the Attachment field
- 4. Then click on the attached file.

### **Electrical Characteristics Summary:**

Full characterization and ESD performance meet datasheet specification. Detail of electrical characterization result is available upon request.

Electrical characteristics are not impacted.

#### **List of Affected Parts:**

**Note:** Only the standard (off the shelf) part numbers are listed in the parts list. Any custom parts affected by this PCN are shown in the customer specific PCN addendum in the PCN email notification, or on the <u>PCN Customized Portal</u>.
